

## **Name of the Event: Local level service systems and Regenerative Agriculture**

**Venue: Retreat Continental, Ranchi**

**Date: 18/12/2023**

On December 18, 2023, a workshop was organized on the topic of Regenerative Agriculture and Local Agricultural Service System under the aegis of PRADAN. The main objective of this workshop is to

promote regenerative agriculture and also to emphasize on promoting local farming methods. What is the current status of regenerative agriculture in Jharkhand, what are the possibilities of taking it

forward and to discuss the strategy for one year ahead, farmers from different districts of the state, entrepreneurs of bio-resource centres, Panchayat representatives, Stakeholders, Agricultural scientists, and Experts from regenerative agriculture were present.

At the beginning of the workshop, farmers, entrepreneurs of bio-resource center and Panchayat representatives shared their experiences. Suganti Devi, a female farmer from Gumla, says that if all the women plan and work together on organic farming, then the manures and others pesticides used in it can be easily prepared. All farmers will be able to work with a new energy.

Duryodhan Nagesia, entrepreneur of Bio-Resource Center, is rearing 25 animals in his house to make organic fertilizers. Due to this they are getting adequate quantity of cow dung and cow urine. In taking this campaign forward, Panchayat representatives talked about giving full cooperation in promoting regenerative agriculture in their respective areas. Shri Budhram Bada, the former Mukhiya, Ita, Bero gave this message to the farmers that they should produce crops by doing regenerative agriculture and we will

help them in managing the market. And all the experts gave valuable inputs to the farmers.
