

**Name of Event: Workshop on Food & Nutrition**

**Venue: Ranchi**

**Date: 16/10/2023**

Workshop on food & nutrition was organized on 16<sup>th</sup> October, 2023 at HEC Ground, Ranchi in the occasion of World Food Day. On this occasion, many stakeholders had shown their interest to put up stalls on nutritious foods accompanied by IEC materials so that the people are made aware on these issues and the State can come out of the malnutrition status and also anemia could be reduced in the state.

The other objective of this event has to focus on the importance of local food systems. How these traditional systems have been an edge in times of crisis and saved humanity from starvation and deprivation. It is these local food systems that also help check issues of anemia and malnutrition in a society and that is why it has been evident that the Tribal communities are less affected by these issues.

Around 500 people, including government officials from many departments and stakeholders, attended in this event.
